-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 10 July 2006.
- 2a) This action is FINAL.                            2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1,3-11,13-20 and 22-28 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1,3-11,13-20 and 22-28 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 02 December 1999 is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All    b) Some \* c) None of:
  1. Certified copies of the priority documents have been received.
  2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_

- 4) Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_ 9/15/2006
- 5) Notice of Informal Patent Application
- 6) Other: \_\_\_\_\_

## DETAILED ACTION

1. This Office Action is in response to the filing of the Amendment, on 7/10/2006, has been considered but they are moot in view of the new ground(s) of rejection. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, this action is made **FINAL**.
2. Claims 1, 3-11, 13-20, and 22-28 are presented for examination.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following terms are lack of proper antecedent basis:

the storage element - claim [11, lines 8-10].

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. **Claims 1, 9-11, 16, and 20 are rejected under 35 U.S.C. 102 (e) as being anticipated by Dye, US Patent no. 6,173,381.**

4. In re claim 1, Dye shows a controller chip [fig 5] comprising:  
a graphics engine [graphic engine, 202, 204, 206, 210, 212, 214, 216, 221, 222, fig 5] operative to manage a memory [110, fig 2], the graphic engine comprising an integral interface [202, fig 5; comprises a single chip, col 9, line 31]; and  
a first in first out (FIFO) buffer [230, fig 5; IMC instruction register FIFO, col 12, line 17; col 3, lines 10-13] coupled to the graphic engine, the FIFO buffer being accessible by a central processing unit (CPU) [120 in fig 2; HOST in fig 2] through the graphic engine, wherein the graphic engine receives commands from the CPU via the integral interface, and manages the FIFO buffer via the integral interface [col 12, lines 4-27; figs 2 and 5].

5. In re claims 9, and 16, Dye shows a graphics controllers chip [212, fig 5].

6. In re claim 10, Dye shows a graphics engine [212, fig 5].

7. In re claim 11, Dye shows a system for providing a command stream in a computer system [fig 5] comprising:

    a central processing unit (CPU) [102, fig 2];  
    a controller [140, fig 2] coupled to the CPU and including a graphics engine [graphic engine, 202, 204, 206, 210, 212, 214, 216, 221, 222, fig 5] comprising an integral interface [202, fig 5; comprises a single chip, col 9, line 31];  
    a memory [110, fig 2] coupled to the controller, the memory being managed by

the controller; and

a first in first out (FIFO) buffer [230, fig 5; IMC instruction register FIFO, col 12, line 17; col 3, lines 10-13] coupled to the controller, the storage element being accessible by the CPU through the controller, wherein the controller receives commands from the CPU via the integral interface manages the storage element via the integral interface and writes the commands into the memory [col 12, lines 4-27; figs 2 and 5].

8. In re claim 20, Dye shows a method for providing a command stream in a computer system [fig 5], the computer system including a central processing unit (CPU) [102, fig 2], a controller [140, fig 2] coupled to the CPU, a memory [110, fig 2] coupled to the controller, the memory being managed by the controller, the method comprising the steps of:

(a) providing first in first out (FIFO) buffer [230, fig 5; IMC instruction register FIFO, col 12, line 17; col 3, lines 10-13] within the controller ; and

(b) allowing the FIFO buffer to be accessible by the CPU via an integral interface [202, fig 5; comprises a single chip, col 9, line 31] of a graphic engine [graphic engine, 202, 204, 206, 210, 212, 214, 216, 221, 222, fig 5] of the graphics controller.

### ***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having

ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**10. Claims 3-8, 13-15, 17-20 and 22-28 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Dye, US Patent no. 6,173,381, in view of Davis et al., US Patent no. 4,991,169.**

11. In re claims 3 and 6, Dye does not show circular buffer and the effective size of the FIFO buffer as view by the CPU can be as large as the memory. Davis et al show the circular buffer [col 4, lines 4] and the effective size of the FIFO buffer as view by the CPU can be as large as the memory [col 4, lines 1, "shared memory"]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include the circular buffer and the effective size of the FIFO buffer as view by the CPU can be as large as the memory as shown in Davis et al. for saving the cost of memory.

12. Claims 13, 17, and 25-26 are rejected under the same rationale as discussed above in claims 3, and 6.

13. In re claims 4, 5, 7 and 8, Dye does not explicitly show a circular FIFO buffer, a double buffer, a triple buffer, a checking mechanism. Official Notice is taken that both the concept and the advantages of providing for a circular FIFO buffer, a double buffer, a triple buffer, a checking mechanism are old and well known in the art. Therefore, it would have been obvious to the ordinary skilled person in the art at the time the invention was made to include the FIFO, circular FIFO buffer, double buffer, triple buffer, checking mechanism in Dye for more flexible device by allowing it to operate in

multiple configurations and more reliable system by controlling and predicting data flow.

14. Claims 14-15, 18-19, 22-24, 27, and 28 are rejected under the same rationale as discussed above in claims 4, 5, 7 and 8.

***Response to Arguments***

Applicant's amendment with arguments has been fully considered but they are not persuasive.

In the remarks, applicants argued in substance that the claimed invention does not show a controller chip that includes a graphics engine, a memory, and a FIFO buffer wherein the graphics engine is operative to manage the memory and wherein the graphics engine comprises an integral interface as claimed in claim 1. In addition, Dye does not show the graphics engine receiving commands from the CPU via the integral interface, and managing the FIFO buffer via the same integral interface.

The rejection states as above that Dye shows a controller chip [140, fig 5] that includes a graphics engine [graphics engine, 202, 204, 206, 210, 212, 214, 216, 221, 222 fig 5], a memory [110, fig 2], and a FIFO buffer [230, fig 5; IMC instruction register FIFO, col 12, line 17; col 3, lines 10-13] wherein the graphics engine is operative to manage the memory and wherein the graphics engine comprises an integral interface [202, fig 5]. In other words, the integral interface [202] is part of the graphics engine [202, 204, 206, 210, 212, 214, 216, 221, 222, fig 5].

Dye also shows the graphics engine receiving commands from the CPU [120 in

fig 2; HOST in fig 5] via the integral interface [202 in fig 5] that is a part of the graphics engine.

Dye also shows the graphics engine managing the FIFO buffer [230, fig 5; IMC instruction register FIFO, col 12, line 17; col 3, lines 10-13] via the same integral interface [202 in fig 5; comprises a single chip, col 9, line 31].

As stated above, the graphics engine is comprising an integral interface [202; comprises a single chip, col 9, line 31], FIFO [204, 206], execution engine [210], graphics engine [212], and memory controllers [221, 222]. Since the IMC 140 in fig 5 comprises a single chip, Dye clearly shows the interface 202 is an integral interface.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any response to this action should be mailed to:

Mail Stop \_\_\_\_\_  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

The centralized fax number is 571-273-8300.

The centralized hand carry paper drop off location is:

U.S. Patent and Trademark Office  
Customer Service Window, Mail Stop \_\_\_\_\_  
Randolph Building  
401 Dulany Street  
Alexandria, VA 22314

Any inquiry of a general nature or relating to the status of this application should be directed to the central telephone number (571) 272-2100.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harold Kim whose telephone number is 571-272-4148.

The examiner can normally be reached on Monday-Friday 9AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fritz Fleming can be reached on 571-272-4145. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

Art Unit: 2181

For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 or call 571-272-1000.
